

APPLICATION MODERNIZATION AND AUTOMATION

- Industry** : Health Care
- Project** : Application Modernization & Automation
- Technology** : ASP. Net Core, WebAPI, SQL Server, BootStrap, HTML5, JQuery
- Service** : Azure SQL Server

AT A GLANCE

Challenges

- Diagnosis needs report delivery
- Automated Image acquisition notifications

Solutions

- Azure Blob containers configuration
- Email Notifications

OBJECTIVES

Healthcare Software application that ingests the scans, runs intelligent models and then delivers a report to doctors and radiologists that prioritizes the diagnosis needs to be ported to the Azure platform. Automated image acquisition from their partner and get notified.

SOLUTIONS

Configured Azure Blob containers for receiving the uploads and enabled email notifications on upload completion.

BENEFITS

**Zero Downtime
Deployment**

**Enhanced
Compatibility**

**Increased
Productivity**
