

Cloud Assert is a Seattle, Washington based company, providing services and solutions for private, public and hosted cloud.

## Services we provide

### ■ Cloud Architecture and Design

- ✓ We help determine the best architecture that is high performing, highly available, fault tolerant, scalable and cost effective for your business needs. We bring years of our experience in designing and implementing cloud platforms to your business.
- ✓ We work with you to understand the business goals, partner with management and IT teams to identify and assess infrastructure, performance and monitoring needs. With the requirements and knowledge gathered, we will analyze and present recommended architectural designs.

### ■ Windows Azure Pack

- ✓ Integration Services: Integrate to and from Windows Azure Pack with your existing services.
- ✓ Deployment Services: Architect and automate WAP deployments with appropriate high availability topology, stamp sizes for expected scale with proper backup and restore mechanisms.
- ✓ Custom Resource Providers: With our extensive experience in designing, developing and deploying custom solutions with Windows Azure Pack, we will help take your custom resource provider solutions to market faster with quality.
- ✓ Migration and Onboarding: We help migrating from another platform and onboarding applications to Windows Azure Pack and Windows Azure Cloud.

### ■ Development and Implementation

- ✓ Our experienced resources will help you develop and deploy world class cloud solutions.
- ✓ We help analyze performance bottlenecks in the infrastructure and in code to help move your application to be cloud ready and high performing.

## ■ Operations and Monitoring

- ✓ Our Services Maturity Model and best practice checklist based approach guarantees to pass on years of our learnings in operating matured large scale services and establish both process and tools necessary to meet your business Service Level Agreements (SLA).
- ✓ We help developing operations and monitoring strategy appropriate for your organization and bring various units and teams on the same page.

## Packaged solutions

### ■ Azure Connect for Windows Azure Pack

- Integration with public Azure cloud.
- Single pane of glass view of both public and private cloud resources.
- Monitor and optimize resource usage across clouds.

### ■ V-Connect for Windows Azure Pack

- E2e VMWare integration with Windows Azure Pack.
- Bring in VMWare virtual machines as a service inside Windows Azure Pack.
- Leverage existing VMWare investments while taking advantage of Windows Azure Pack.

## Our Strengths

### ■ Technical Leadership & Agile Development

- Our knowledge, experience and knowhow on Windows Azure Pack and Cloud Architectural principles is unparalleled.
- With the strong technical team, ability to quickly grasp business needs and efficient project management, we deliver solutions in fast cycles.
- By delivering solutions in short iterations, we encourage and adapt to customer feedback quickly and easily.

- **Best Practices and Services Maturity Model**
  - As an ex-Microsoft manager our founder ran Windows Azure Websites team for both public and private cloud. We were at the crux of designing, developing and running truly world class large scale services in Azure with several million requests per day.
  - We know what it takes to build a matured, reliable and scalable service; and we know how to monitor and operate efficiently; we would like to help our customers achieve that in day one, without needing them to go through long learning process.
- **Access & Getting it Done**
  - We are result oriented and have a culture of continuous delivery with agile methodologies.
  - We are located close to Microsoft campus with quick access to Windows Azure engineering team resources. We partnered with Windows Azure team to help our customers cross many technical hurdles quickly and help them focus on business goals.
  - We are part of Windows Azure Advisors group. We actively partner with Azure product teams to provide feedback and help improve Windows Azure features.
- **Global Delivery Model**
  - We have team in multiple geographies to accelerate time to market and improve cost efficiencies.
- **Desire to Excel**
  - We are hungry, to help and prove that we go above and beyond to satisfy our customers. We feel proud to be a customer and people centric company.
